Professional Summary

Astrophysics graduate with a strong foundation in systems engineering and data analysis/predictive modeling. Successful in high-volume financial operations maintaining 99% quality metrics while managing 130 fundings a month and strict deadlines. Hands on experience in procurement as a technical service writer generating quotes and managing end-to-end project life-cycles. Extensive experience in high stress/fast paced industries; committed to applying strong technical skills to solving real world problems.

Education

Arizona State University

August 2020 - May 2024

Bachelor of Science in Earth and Space Exploration – Astrophysics

Tempe, Arizona

- **Relevant Coursework:** Exploration Systems Engineering, Project Approaches, Project Leadership, Coding for Exploration, Programming for Physicists, Astrophysics I & II

Experience

Wells Fargo Bank

October 2024 – Present

Loan Funding Processor

Chandler, Arizona

- Operated under strict deadlines processing and validating mortgage documents for compliance with TRID regulations to coordinate successful funding. Became a top performer within a year; 99% quality metrics, pipeline of 130 fundings a month.
- Coordinate the transfer of funds from the lender (Wells Fargo) to escrow companies.
- Interact with internal and external clients and collaborate with peers, colleagues and managers to resolve issues and achieve goals.

Mesa Golf and Sunsplash

March 2018 – July 2024

Aquatics Manager: Maintenance Safety Officer

Mesa, Arizona

- Acted as manager on duty: oversaw staffing of the entire water park; maintained and operated high value equipment; monitored pool chemistry and performed adjustments to comply with health standards; oversaw the operation of complex systems; performed daily safety checks, and completed repairs and maintenance as needed.
- Implemented and maintained a database to track audits and safety training, focusing on data entry and implementing remediation plans.

Junction Bike Company

November 2020 – April 2023

Service Writer and Technician

Mesa, Arizona

- Facilitated migration to a cloud based POS system (Lightspeed) to track inventory and manage work tickets. Performed inventory management and lead procurement for essential and job specific materials.
- Created schedules, ordered materials, and coordinated labor for a range of projects.

Projects

SESE Senior Exploration Capstone | CATIA, Cameo Systems Modeler, Model Based Systems Design, MBSE, Python, Jython,

- Processed and analyzed complex datasets in Python. Used graphical and analytic packages to identify trends and potential anomalies in telemetry data.
- Completed trade studies, cost analysis, risk analysis, requirement validation, and presented design reviews.
- Identified potential thermal anomalies and risk factors using the basic model built. Applied predictive modeling to validate system reliability and ensure mission success

Technical Skills

Technologies: Excel, Projects, Power BI, Python, SQL, Mathematica, Numpy, Matplotlib, Pandas, CAMEO Systems Modeler, CAITA, Siemens NX CAD, macOS, Windows, Linux (Debian, Red Hat)

Concepts: Project Management, Supply Chain and Operations, Procurement, Asset Tracking, Root Cause Analysis, Data Validation, Concept of Operations, Design Review, System Architecture, System Hierarchy, Agile Approaches, Traditional Waterfall Project Approach, Hybrid Approaches
